## EMPLOYMENT HISTORY

### Senior Software Engineer, Bolt

Remote

Apr 2022 — Dec 2023

- Led the charge on a partnership with Mastercard, providing a **200% increase in number of accounts** and a **6% boost in conversion**.
- Complete overhaul of the checkout interface, powered by **Typescript/React/Redux**.
- Helped design a component library to be used by all engineers/designers

### Software Engineer, Opendoor

Los Angeles/Remote

Oct 2018 — Mar 2022

- Mobile app work in **React-Native/Typescript**, using **Apollo GraphQL**.
- Website features and maintenance using **React** and **Typescript** with a **Ruby on Rails** backend.
- Had an active hand in launching the latest products to help our customers buy and sell seamlessly, including but not limited to: a 100% self-hosted real-time chat service in use by thousands of users monthly, a new hub encompassing both the buyer and seller experience as well as countless other features that are still in use to this day.

### Software Engineer, SeeTickets USA

Los Angeles

Dec 2016 — Sep 2018

- Built ticket kiosk iPad application using **Ionic Framework** and **Angular 5**.
- Helped in-progress microservice architecture migration (from .NET monolith), primarily built on **Node.js, Express, Angular 5** and using the **Serverless** framework as well as the whole AWS deployment stack (CodePipeline, Cloudformation, Lambda)

### Software Engineer, Azzana Consulting

Paris, France

Oct 2014 — Jul 2016

- Created websites from scratch using ASP.Net/HTML/CSS/JS following Google's Material Design.

## EDUCATION

### Master's Degree, EPITECH

Paris, France

Sep 2010 — Sep 2015

### California State University, Long Beach

Long Beach, CA

Oct 2013 — Aug 2014
